

# Sleepyhead ZERO

MATTRESS

## ZERO RG200

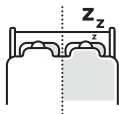

### LOVE YOUR PLANET, LOVE YOUR SLEEP

The Sleepyhead Zero RG200 features a layer of Dreamfoam:Gel, making it the most comfortable mattress that can be returned to its place of purchase to be recycled.

#### DREAMFOAM:GEL

This new generation of gel infusion technology provides great support while balancing your temperature.

#### LOW-PARTNER DISTURBANCE

Specially designed to help minimise mattress movement when your partner decides they need a drink of water at 3am.

#### SUSTAINABLE SUPPORT CORE

It starts with scientists in white coats and ends with a truly remarkable mattress core that's not only super supportive, it's also able to be recycled into other products when it comes to the end of its useful life.

#### RECYCLABLE

Sleepyhead Zero is the only mattress in New Zealand that can be returned to its place of purchase to be recycled.

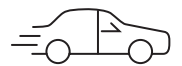

ECOLOFT

#### ECOLOFT FIBRE

Plastic bottles that would otherwise be destined for landfill, or end up in the ocean, are recycled becoming an environmentally smarter fibre that's every bit as comfortable as other traditional polyester fibres.

Available in Queen (153cm x 203cm) or Single (91cm x 188cm)
